

117 MW Solar Price

Overview

Cost estimates for a utility-scale solar project typically span \$800,000 to \$2,000,000 per MW before incentives for smaller to mid-size runs, with larger facilities often dropping to \$1.8M per MW due to economies of scale. Assumptions: region, specs, labor hours. Department of Energy (DOE) Solar Energy Technologies Office (SETO) and its national laboratory partners analyze cost data for U.S. These benchmarks help measure progress toward goals for reducing solar electricity costs. Renewable Energy Has Achieved Cost Parity: Utility-scale solar (\$28-117/MWh) and onshore wind (\$23-139/MWh) now consistently outcompete fossil fuels, with coal costing \$68-166/MWh and natural gas \$77-130/MWh, making renewables the most economical choice for new electricity generation in 2025. Buyers usually see a broad range in solar cost per megawatt (MW) due to project scale, location, and system design. This article presents cost ranges in USD and clear per-unit and total estimates. NLR analyzes the total costs associated with installing photovoltaic (PV) systems for residential rooftop, commercial rooftop, and utility-scale ground-mount systems. Cumulative solar capacity is measured in megawatts. Data source: IRENA (2025); Nemet (2009); Farmer and Lafond (2016) - Learn more about this data Note: Costs.

117 MW Solar Price

[Cost Of Renewable Energy 2025: Complete Guide To Solar, Wind](#)

Renewable Energy Has Achieved Cost Parity: Utility-scale solar (\$28-117/MWh) and onshore wind (\$23-139/MWh) now consistently outcompete fossil fuels, with coal costing \$68 ...

[Solar Photovoltaic System Cost Benchmarks](#)

The U.S. Department of Energy's solar office and its national laboratory partners analyze cost data for U.S. solar photovoltaic systems to develop cost benchmarks to measure progress towards goals and ...

[Norway adds 117 MW of solar in 2025](#)

Norway installed 117 MW of solar in 2025, according to figures published by the Norwegian Water Resources and Energy Directorate (NVE). The result is down on both 2024's result ...

[Latest Solar Price Chart and Dashboard Carbon Credits](#)

While residential solar pricing is typically higher per megawatt-hour (MWh) than utility-scale projects, homeowners can lower costs through net metering, tax credits, and long-term energy savings.

[Solar Installed System Cost Analysis , Solar Market Research](#)

Publications U.S. Solar Photovoltaic System and Energy Storage Cost Benchmarks, With Minimum Sustainable Price Analysis: Q1 2023, NLR Technical Report (2023) U.S. Solar Photovoltaic ...

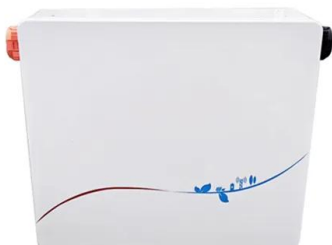

LEVELIZED COST OF ENERGY+

Comparative LCOE analysis for various generation technologies on a \$/MWh basis, including sensitivities for U.S. federal tax subsidies, fuel prices, carbon pricing and cost of capital Illustration of ...

[Solar photovoltaic module prices vs. cumulative capacity](#)

Average price of solar modules versus cumulative installed capacity. Prices are expressed in US dollars per watt, adjusted for inflation. Cumulative solar capacity is measured in megawatts.

Sapphire Solar+Storage

The 117 MW solar and 117 MW storage project, Sapphire Solar+Storage, is located in Desert Center, California. EDF power solutions is handling the development of this project.

[Solar Cost Per Mw: Price Ranges and Drivers 2026](#)

Buyers usually see a broad range in solar cost per megawatt (MW) due to project scale, location, and system design. The main cost drivers include hardware quality, installation labor, ...

[Demystifying Solar Power Costs Per Megawatt in 2025](#)

In 2025, utility-scale solar projects average \$0.89-\$1.23 per watt, translating to \$890,000-\$1.23 million per megawatt. But hold your photovoltaic horses - residential systems still run 30-40% higher due to ...
