## Overview

---

Industry standards recommend setting a minimum backup power runtime based on your location and the reliability of the local grid. For rural sites with unstable power, you should aim for several hours to multiple days of autonomy. As 5G technology reshapes telecommunications with faster speeds and lower latency, a dense, reliable infrastructure becomes vital. Outdoor telecom cabinets form the essential backbone of these new networks, providing protection, optimal cooling, and power to high-performance 5G equipment. It ensures reliable power during outages and reduces costs. Choose lithium-ion batteries over lead-acid for longer. equipment mounting. The e is a wide range of equipment mounting, cooling and battery. As an OEM/ODM specialist, Mulan Group delivers custom -engineered telecom cabinets for 5G towers, base stations & harsh environments.
