

After the photovoltaic panels are installed

LIQUID COOLING ENERGY STORAGE SYSTEM

EMS real-time monitoring
No container design
flexible site layout

Cycle Life
≥8000

Nominal Energy
200kwh

IP Grade
IP55

Overview

After your solar system installation, the first thing that needs to be taken care of is passing the solar inspection. Since the PV installation involves a lot of electrical and construction work, your local authority and utility provider go through a final inspection from a safety. Solar panels are a great investment for any homeowner. One can continue reaping their immense power-saving and clean energy benefits for the next 20 to 30 years. You'll be relieved to hear that the post-installation steps are relatively easy compared to the DIY solar panel installation process. Congratulations! Installing solar panels is a big investment that will pay dividends for years through lowered electricity bills and reduced carbon footprint.
