

Albania goes to work on solar panels

Overview

On , the Albanian government approved the development of two new solar power plants, totaling 54 megawatts (MW) in capacity. Albania has achieved a significant milestone in its renewable energy transition, successfully generating 10% of its total electricity from solar power in 2025. A proposed unit in Fier, the country's photovoltaics hub, would be the second-biggest in the country. Albania's Ministry of Infrastructure and Energy has received expressions of interest from four companies looking to construct four solar projects with a. Albania marked a significant milestone in its energy sector with the inauguration of the Karavasta Photovoltaic Park, the largest solar energy facility in the Western Balkans. The €42 million project is co-financed by an EU contribution of €9.

Albania goes to work on solar panels

[Investments in solar energy experience significant growth in Albania](#)

Approximately one year after the start of construction on the solar energy park in the Karavasta area, the first rows of solar panels are being installed on the barren and salty land.
