

Automatic flushing of rooftop photovoltaic panels

Overview

Automatic cleaning systems for roof-mounted solar panels revolutionize maintenance by eliminating manual cleaning challenges. Solar panels represent a significant investment in sustainable energy, but their efficiency relies heavily on proper maintenance. But climbing on the roof to manually wash them is tedious, risky, and often leads to inconsistent cleaning. Robotic cleaners are pricier but require. We offer a fully automated solar panel cleaning system with no moving parts that you can control from your phone. Regular cleaning can increase production by up to 30%. Designed in full compliance with manufacturers' requirements.
