

# Baku solar thermal energy

## Overview

---

Azerbaijan has launched the country's biggest renewable energy investment project to date: the construction of two solar plants and a wind power plant. It marks a major step in Baku's ambitious plan to generate 30 percent of its power needs via renewable sources by 2030. The three plants – the 445. Furthermore, the transition to green energy, enhancing energy efficiency and establishing low-carbon economy within the Socio-Economic Development Strategy of the Republic of Azerbaijan for 2022-2026 have been set as one of the main targets of national development. This article explores operational projects, emerging trends, and how innovations like grid-scale batteries are stabilizing power supply while reducing. Agreements on three solar energy projects were signed in Baku as part of the 11th Ministerial Meeting of the Southern Gas Corridor Advisory Council and the 3rd Ministerial Meeting of the Green Energy Advisory Council. Energy Minister Parviz Shahbazov and CEO of the company Eldar Mammadzade signed. Azerbaijan's first utility-scale solar facility, the 230 MW Garadagh plant, launched in late 2023. az) On the outskirts of Baku, the smell of sulfur hangs thick in the air.
