

Battery safety australia

Overview

Batteries are safe when installed and maintained correctly, according to data from the Australian Competition and Consumer Commission (ACCC), which has tracked only a small number of incidents despite over 200,000 units installed nationwide. Compare solar and battery quotes online. The ACCC saw a 92% increase in reported lithium-ion battery incidents including swelling, overheating and fires in 2022 compared to 2020. With lithium (ion) batteries part of so many things in our homes, including mobile phones, power tools, eBike, and. This specification is a major step forward in supporting the safe deployment of battery energy storage systems (BESS) across Australian homes and small businesses. Australian standards ensure systems are built and installed to minimise risks.
