

# Bolivia small off-grid energy storage power station

## Overview

---

A 5MW solar-diesel hybrid power plant connected battery storage is to be installed in Bolivia's Pando province. [pdf]. These systems typically provide essential power for lighting, charging mobile phones, and running small appliances, fundamentally transforming the quality of life for rural families. SMA is not only supplying photovoltaic inverters for this project, but is also providing an SMA Fuel Save Controller for demand-driven control of solar. Bolivia's ambitious plan to triple its renewable energy capacity by 2026—adding 902 MW of wind and solar—sounds like a green energy dream come true. But here's the kicker: intermittent renewables need a reliable sidekick. There are several types of energy storage technologies that can be employed to support Bolivia's energy transition, including batteries, pumped hydro storage, and thermal energy storage. Given Bolivia's strong and consistent solar radiation, the country has high potential to expand its. aures,Bolivia.
