

Can home solar lights be turned on

Overview

Solar lights have an on/off switch, so you can manually turn them on and off when needed. The panel grabs sunlight during the day. It seems like a contradiction, right?

The whole appeal of solar lighting is that it just works —no wiring, no timers, no fuss. But that little switch?

It's one of the. In some cases, you will have to turn off your solar lights or, they might get damaged. Considering that they run on their own and get their energy from the sun's UV rays, this seems like it would be pointless. This allows the cells to absorb energy effectively for optimal performance.
