

# Can photovoltaic panels be used in ordinary houses

## Overview

---

Solar panels are used to power everything from calculators to sports stadiums to satellites — and they can just as easily be used to power a home. You don't need to be a rocket scientist - or anything close to it - to get solar panels for your home. Solar Technology Has Reached Peak Efficiency: Modern monocrystalline panels achieve 20-24% efficiency rates in 2025, with the average residential system size now at 11kW, producing 12,000-16,000 kWh annually - enough to power most homes completely. Multiple System Options Serve Different Needs:. Is my home suitable for solar panels?

Solar panels are built to work in all climates, but in some cases, rooftops may not be suitable for solar systems due to age or tree cover. This article explores how photovoltaic systems work in residential settings, addresses safety concerns, and shares real-world success stories. On average, solar panels pay for themselves after 10 years, making them a.
