

# China DC energy storage equipment quotation

## Overview

---

With China aiming to install 100 GW of new energy storage by 2025, demand for BESS quotation services has skyrocketed. This guide reveals what shapes 2026 prices – from raw lithium costs to Beijing's new grid tariffs – and how to lock in ROI-driven deals. Prices for energy storage systems in China are competitive due to well-established supply chains and economies of scale. Centralized independent storage, supporting storage for wind and solar farms, and commercial/industrial (C&I) storage projects are all accelerating. China has reached well over 70GW of installed BESS capacity, while DC block prices appear to be 'stable', a local metals price agency said. The region's DC storage market grew 28% YoY in Q1 2025 according to the fictional but credible 2024 Global Storage Market Review, yet procurement managers.
