

# Comparison of IP55 ratings for outdoor energy storage cabinets

## Overview

---

In this article, we explain what an IP55 rating is, how protection against dust and water is achieved, and which design features allow an IP55 enclosure to withstand outdoor and industrial environments. We will also clarify when IP55 is sufficient — and in which cases you may need to consider a. Ingress Protection (IP) ratings are the first line of defense against catastrophic failures, thermal runaway risks, and warranty voids. For anyone considering BESS deployment, understanding the nuance of enclosure protection is vital. Saipwell offers reliable Electrical Enclosure solutions for every requirement, ensuring your equipment is protected from weather. The International Electrotechnical Commission (IEC) provides standards for specifying the protection levels of enclosures, commonly known as the IP (Ingress Protection) ratings. An IP grade of at least IP55 ensures equipment stays safe from dust and water ingress.

## Comparison of IP55 ratings for outdoor energy storage cabinets

---

### [Do you need IP protection levels for your Outdoor Cabinets?](#)

For most outdoor installations, IP55 or IP65 is the safer option. These ratings offer stronger protection against dust and rain, including wind-driven water. IP65 is especially popular ...
