

# Corrosion-resistant folding containers for steel plants

## Overview

---

Key specs include external/internal dimensions, collapsed height, tare weight, maximum payload capacity (static and dynamic), material grade (e., Corten steel for corrosion resistance), and hinge design robustness. Ensure dimensions align with your pallets, racking systems. Steel King's Hold 'n Fold® industrial steel storage containers combine the cost savings of a collapsible (light duty) container with the durability of a rigid (heavy duty) container. Because these containers are stackable up to six high when loaded to capacity, you get the flexibility you need for. Heavy-Duty Performance — 1500 lbs load capacity built for warehouse, factory, or workshop material transport. Industrial-Grade Steel — Constructed from Q235 steel mesh with 9-gauge wires. These bulk containers are made of steel with a zinc galvanized finish for long-lasting durability. Collapsible and stackable - Stacks up to 5 high. Spring-loaded latches provide easy setup and takedown.
