

# Electric energy storage system construction

## Overview

---

The amendment to the Construction Law Act of 4 December 2025 (the “Amendment”) introduced new solutions relating to the construction process for energy storage systems. It specifies which projects require a building permit or notification, and those that require neither (as discussed in more detail). Electrical energy is a form of energy that cannot be stored directly, but has to be transformed into other forms, such as chemical, thermal, mechanical or potential energy; these forms of energy can then be converted back into electrical energy when needed. Energy storage systems are devices.
