Types of Energy Storage
Pumped-Storage
Hydropower
Electrochemical Storage
Thermal Energy Storage
Flywheel Storage
Compressed Air Storage
Solar Fuels
Virtual Storage
The most common type of energy storage in the power grid is pumped hydropower. But the storage technologies most frequently coupled with solar power plants are electrochemical storage (batteries) with PV plants and thermal storage (fluids) with CSP plants. Other types of storage, such as compressed air storage and flywheels, may have different characteristics. See more on [energy.gov](#)
