

# Energy storage container for Armenian power station exchange

**SMART GRID & HOME**

## Overview

---

Market simulations indicate that a 30MW / 120MWh battery storage variant is best suited for Armenia Battery 30MW / 120MWh Battery 100MW / 400MWh Case A - flexible exchanges with neighbours -0.02 M\$ -74 M\$ Case B - exchanges with neighbours as today 16 M\$ 2 M\$. As Armenia works towards the Government's ambitious renewable energy targets and the share of variable renewable generation increases, the country might need to install battery storage systems to ensure the reliable and smooth operation of its power system. While the need for battery storage is. With aging infrastructure and growing energy demands, Armenian power plant energy storage isn't just tech jargon—it's become the nation's electricity survival kit. The global energy storage market, worth \$33 billion [1], offers solutions this Caucasus nation is now embracing. The Government of Armenia is looking to launch an energy storage program leading to the development of the first. Over the past five years, Armenia's energy storage capacity has grown by 400%, reaching 150 MW in operational projects as of 2023. This surge aligns with the government's target to achieve 30% renewable energy integration by 2025.
