## Overview

---

A Containerized Energy Storage System (ESS) is a modular, transportable energy solution that integrates lithium battery packs, BMS, PCS, EMS, HVAC, fire protection, and remote monitoring systems within a standard 10ft, 20ft, or 40ft ISO container. With the growth of renewable energy sources such as solar and wind power, the need to store energy efficiently has become essential. In this scenario Energy Storage Systems (ESS) stand out. They are responsible for storing the energy generated and making it available when it is most needed, such as. If you've researched solar panels, wind farms, or home batteries, you've likely seen the term "ESS."
