

Fixed photovoltaic bracket on cement roof

Overview

Basic flat roof fixed bracket features: ① Applicable to any specification of crystalline silicon modules and some thin-film modules; ② Pre-embedded anchor bolts on the installation surface, or similar cement foundation; ③ Design the installation angle according to actual needs. The installation structure of solar photovoltaic brackets should be simple, strong and durable. However, selecting the right mounting system is critical to ensure the durability, efficiency, and safety of the solar array. Solar panels can't be put on a roof without first having mounting brackets installed. There are two common methods for installing solar panels on concrete tile roofs.
