

# Green Energy Solar Power Station

**LPR Series 19"  
Rack Mounted**

## Overview

---

A photovoltaic power station, also known as a solar park, solar farm, or solar power plant, is a large-scale grid-connected photovoltaic power system (PV system) designed for the supply of merchant power. Using solar energy can have a positive, indirect effect on the environment when solar energy replaces or reduces the use of other energy sources that have larger effects on the environment. Solar energy. Solar energy is the radiation from the Sun capable of producing heat, causing chemical reactions, or generating electricity. It is one of the fastest-growing renewable energy technologies and is playing an increasingly important role in the global energy transformation. The Hybrid Inverter power range is from 3kW to 60kW, compatible with low voltage (40-60V) batteries and high voltage (150-800V) batteries.
