Overview

Here's how inverter sizes usually correlate: Panels: 3,000 – 6,000 W Inverter: 3,000 W to 5,500 W Panels: 6,000 – 10,000 W Inverter: 5,500 W to 8,000 W (some size down to 5 kW depending on shading) Panels: 10,000 – 20,000 W Inverter: one or two inverters of a combined 10 kW–15. Your solar inverter serves as the translator between your panels and your home's electrical system. Solar panels generate direct current (DC) electricity, but your home runs on alternating current (AC). While there are several types of inverters including hybrid, grid-tie, and off-grid inverters they all perform. Choosing the right size for a solar inverter can feel confusing, especially when most guides bury you under formulas and electrical jargon. But here is the truth: you don't need to be an electrician to make a smart inverter choice. Without a properly installed solar.
