

How long is the contract for photovoltaic panels installed on the roof

Overview

Once the SPPA contract is signed, a typical installation can usually be completed in three to six months. An investor provides equity financing and receives the federal and state tax benefits for which the system is eligible. It's just every other part of the process—designing the system, securing permits, connecting to the grid, and final inspections—will take some time. “Typically we say it's a 60-to-90-day timeframe,” said Bryce. r house and you sign a contract to use the system. Contracts often las 20 years or more. The host property can be either owned or leased (note that for leased properties, solar financing works best. Also, your roof warranty might become useless if the solar panels aren't installed correctly, and some contracts make it your job to prove the damage wasn't your fault.
