

# How long is the warranty period for aluminum photovoltaic brackets

## Overview

---

On average, you can expect a warranty period of 10 to 25 years for top - notch aluminum brackets. This is because aluminum has a natural oxide layer that protects it from rust and other forms of corrosion, making it suitable for long - term outdoor use. If any issues arise. Generally, steel brackets are relatively inexpensive, but the maintenance costs may be higher in the long run; aluminum alloy brackets are slightly more expensive but have advantages such as lightweight and corrosion resistance, leading to lower maintenance costs. Long-Term Benefits In addition to. Nearly all major solar panels have a minimum quality warranty of 10 years and some are as long as 25 years, and the generation warranty is 25 years with a decay rate of 20% within 25 years. Inverter, the only electronic part of the whole system, can convert the DC current into AC current.
