

# How many watts does a solar cell usually have

## Overview

---

The standard range for solar cell wattage lies between 250 to 400 watts per panel. However, this can significantly vary across different manufacturers and types of solar cells, with factors such as efficiency and technology playing sizeable roles. This can vary due to: Example: A 1.7 m<sup>2</sup> panel with 20% efficiency will produce about 340W in full sun. But wattage alone doesn't tell the whole story. In fact, efficiency matters more than wattage when comparing solar panels—a higher wattage can simply. A panel's wattage depends on its size, efficiency, and type. household uses around 30 kWh of electricity per day or approximately 10,700 kWh per year.
