

# How much does a 10kW communication cabinet for a charging station cost

## Overview

---

Workplace: 4 Level-2 ports (two dual pedestals) Hardware \$10,000-\$24,000 + Installation \$8,000-\$24,000 + Soft costs (15-20%) → ≈ \$28,000-\$55,000 total. Lower if wall-mounted with short runs; higher with complex accessible-stall civil work. When planning a commercial EV charging project, installation cost can vary dramatically — from a few thousand dollars for Level 2 AC chargers to over \$100,000 for high-power DC systems. While site conditions matter, a major cost driver is hardware design. At ChargeTronix, we engineer AC and DC. Higher kW means faster charging, but often higher costs. Use them as planning bands and refine with local. This guide gives practical price bands for Level 2 and DC fast charging, explains each cost component in plain terms, and ends with a simple calculator, examples, and a procurement checklist—written with no external links. Level 1 Charging Stations: Level 2.
