

How much is a 540 photovoltaic panel per megawatt

Overview

This typically translates to about \$2.50 per watt of installed capacity (more on price per watt below). The total price depends on your system size, location, roof type, and installer. How much does a 540 watt solar panel cost?

The cost of a 540-watt solar panel typically ranges between \$150 and \$400, varying based on the manufacturer, technology, and market conditions. Price Range: The upfront expenditure for these solar panels can fluctuate according to geographic location. Each year, the U. Department of Energy (DOE) Solar Energy Technologies Office (SETO) and its national laboratory partners analyze cost data for U. solar photovoltaic (PV) systems to develop cost benchmarks. Data source: IRENA (2025); Nemet (2009); Farmer and Lafond (2016) - Learn more about this data Note: Costs are expressed in constant 2024 US\$ per watt. The PV modules produced by European, Japanese, and Korean manufacturers are more expensive because of their attention to detail and reliability. If a panel has higher efficiency, you need fewer panels. How well. As of 2026, the average cost of residential solar panels in the U. is between \$15,000 and \$25,000 before incentives.
