

# How much wind power is generated by German communication base stations

LPSB48V400H  
48V or 51.2V

## Overview

---

Total wind power capacity is 66,344 MW. 8% of the country's electricity consumption. At the end of 2024, there were a total of 28,766 onshore wind turbines in Germany. Source: FA Wind und Solar The graph. Wind power is a major source of electricity in Germany and the Energiewende (German for 'energy turnaround') that has phased out nuclear power in 2023. Domestic generation is about 60% renewable, half of that coming from wind.

## How much wind power is generated by German communication base

---

### Germany , IEA Wind TCP

Germany produces 125.287 TWh from wind energy, which accounts for 22.8% of the country's electricity consumption. Germany continues its rapid transition towards renewable energies with ambitious new ...

### [German onshore wind power - output, business and perspectives](#)

With more than 28,000 turbines and a cumulative capacity of 63 gigawatts (GW) in operation across the country, Germany boasted the largest installed onshore wind fleet in Europe and the third largest ...
