

# How to store batteries in solar generators

## Overview

---

Check your battery's state of charge monthly and recharge before it drops below 50% to prevent sulfation damage that permanently reduces capacity. Store your solar generator in temperatures between 50-77°F, as every 15-degree increase above this range can cut battery lifespan in half. Proper storage of solar batteries significantly impacts their lifespan and efficiency. Knowing how to store a solar generator keeps it primed for action, whether you're gearing up for emergencies or your next outdoor trip. However, depending on where you live, and the season you're in, the. Simply put, solar battery storage refers to batteries that store electrical energy generated by solar panels. Disconnect any connected devices and turn off the generator before storage.
