Infinitus Yingkou. Solar photovoltaics (PV) is a very modular technology that can be manufactured in large plants, which creates economies of scale, but can also be deployed in very small quantities at a time. This allows for a wide range of applications, from small residential rooftop systems up to utility-scale. As certified PodPoint installers Infinitus Energy are here to help. As the fight against climate change accelerates, so too will demand for sources of renewable energy. Some PV cells can convert artificial light into electricity.
