

Ireland container energy storage products

Overview

Our containerised energy storage solutions are available as 10ft and 20ft high cubes and stand almost 3m tall, they can be deployed all over Ireland and further afield (we have a footprint in 90+ countries). They can be used for both commercial/industrial energy. A Battery Energy Storage System (BESS) allows businesses to store energy, providing the crucial flexibility the Irish grid currently lacks. With Ireland's growing renewable generation, robust industrial storage ensures smooth energy management, prevents grid overloads, and, most importantly. These containers are designed to meet the requirements for off and on-grid applications and are ideal in combination with renewable stations. Through paralleling, we can provide up to 8MWh of power output with a total energy capacity of more than 9MWh. Today, we are also a name you can rely on for safe.
