

# Is home solar power generation legal

## Overview

---

It is generally legal across the US to install your own solar energy equipment, though state and local regulations can impose strict limits on how and where you do so. Most places in the country require your DIY solar setup to be permitted and inspected before you can legally operate. There are a number of mapping services that have been developed by SETO awardees that will help you determine if your roof is suitable for solar and can even provide you with quotes from pre-screened solar providers in your area. This endeavor is subject to a comprehensive framework of regulations and. It's legal to do so, but you'll have to be sure you're following your local building codes. A 2015 scholarly article published in the Energy Law Journal outlines these legal rights in detail.
