

Is it good to raise pigeons with photovoltaic panels

Overview

The space beneath your panels is the perfect spot for pigeons to roost, build nests, and lay eggs. But what starts as a minor annoyance quickly becomes a costly nightmare that can slash your system's efficiency and void your warranty. Key takeaways Before diving into solutions, here's what every solar. With the increase in urban sprawl and the availability of food and water, pigeons are moving from nearby parks to home roofs. This can lead to a lot of unwanted messes. Usually, these pigeons leave behind droppings, feathers, and. Pigeons can seriously affect solar performance — their droppings and nests block sunlight, reduce efficiency, and can corrode wiring or panel surfaces over time. Shelter and Protection Pigeons seek.
