

Is the battery of the communication base station inverter harmful

◆ PRODUCT INFORMATION ◆

-  **BATTERY CAPACITY**
50kWh~500kWh
-  **DC VOLTAGE RANGE**
400V~1000V
-  **DEGREE OF PROTECTION**
IP54
-  **OPERATING TEMPERATURE RANGE**
-10~50°C

Overview

This is crucial for communication base stations, as the sensitive electronic equipment requires a consistent power supply to operate properly. Fluctuations in voltage can lead to malfunctions, data loss, and even permanent damage to the equipment. Our 48V LiFePO4 batteries can provide a stable 48V. These batteries store energy, support load balancing, and enhance the resilience of communication infrastructure. Unencrypted MODBUS protocols in legacy systems allow man-in-the-middle attacks. This guide outlines the design considerations for a 48V 100Ah LiFePO4 battery.

Is the battery of the communication base station inverter harmful

[Battery type for communication base station inverter](#)

CAUTION-To reduce risk of injury, charge only deep-cycle lead-acid type rechargeable batteries and lithium batteries, other types of batteries may burst, causing personal injury and damage.
