

Is the investment in photovoltaic panels huge

Overview

Here's the truth: For most homeowners, solar panels are absolutely worth it. The average solar shopper saves between \$37,000 and \$154,000 over 25 years—not including any potential incentives—transforming what feels like a significant upfront cost into substantial long-term. Yes, solar panels are still worth it for the vast majority of U. homeowners in 2026 and beyond, despite the end of the 30% federal solar tax credit for some systems. When. Federal Tax Credit Urgency: The 30% federal tax credit faces potential elimination by December 2025, making 2025 a critical year for maximizing solar investment returns before this substantial incentive disappears. " If you pay cash, the average system costs \$13,962 to \$27,924 before any government help or incentives. Most people break even in 6 to 12 years. This figure cuts through the complexity.
