

Is there solar power for heating

Overview

Photovoltaic solar panels generate electricity, but energy from the sun can be used in different ways. One common way to use solar power is with solar heating systems, which convert solar energy into usable heat instead of electricity. It involves two distinct technologies with different price tags and efficiencies. For smaller, targeted heating needs like a workshop, greenhouse, or even a chicken coop a simple Solar. Solar heating utilizes the energy stored in solar panels to power your home's air and water heating systems.
