

London solar energy for the environment

3.2v 280ah

Overview

Under a new agreement, London will source enough solar power to run its light railway and tram networks entirely on renewable energy. Transport for London has signed a deal with EDF Renewables to purchase electricity from a massive solar array to be erected next year in Essex. The Mayor of London, Sadiq Khan, is committed to increasing the amount of solar energy captured in London as part of his wider ambition for London to become a zero carbon city. In this blog post, we'll explore the key environmental benefits of solar energy in London and the growing role of battery storage in maximizing these. The Mayor of London has set a target of achieving two gigawatts of installed solar energy capacity by 2050. The Mayor has outlined a Solar Action.
