The image shows a tall, grey metal cabinet for an Energy Storage System (ESS). It has a black top and bottom. Two vertical green lines run down the front panel. In the center, there is a blue and white graphic of a battery cell. The letters 'ESS' are printed in green in the upper right corner. At the bottom, there are two yellow warning triangles with a lightning bolt symbol.

Overview

Microgrids (MGs) provide a promising solution by enabling localized control over energy generation, storage, and distribution. This paper presents a novel reinforcement learning (RL)-based methodology for optimizing microgrid energy management. It can connect and disconnect from the grid to. This white paper focuses on tools that support design, planning and operation of microgrids (or aggregations of microgrids) for multiple needs and stakeholders (e., utilities, developers, aggregators, and campuses/installations).
