## Overview

---

The 80kWh battery pack consists of five 16kWh LiFePO<sub>4</sub> battery modules. The enclosure has an IP20 protection rating, meeting the requirements for normal environmental use. This system can output a voltage of 512V. The 80kWh battery meets energy needs for residential, commercial, emergency, and industrial. Using 80KWh HV rack mount lithium battery, integrating scalable lithium-ion battery modules and hybrid solar inverters into one unit provides an economically self-sufficient solution, allowing end users to store solar energy during the day to provide power support when there is no solar energy. The 80 kWh Energy Storage System (ESS) represents a sophisticated commercial energy storage solution meticulously crafted to cater to the distinctive demands of diverse industries. 75 kWh energy capacity, the ESS culminates in. An 80 kWh lithium-ion battery can be used in electric vehicles and stationary energy storage systems. Lithium iron phosphate batteries have high-temperature stability and long cycle life as their standout qualities. The following configurations make up a complete 80kva 80kW solar power plant: Optional solar mounting support, PV combiner boxes, and cables.
