

# New Zealand energy storage power station electricity price

## Overview

---

We provide electricity industry data in a range of flexible packages and rates, to support your business activities when and where you need it. Free dashboard showing real time price and generation data. Wholesale electricity prices dropped dramatically in just two months - from over \$280/MWh in late August 2025 to an average of \$30/MWh in October. This steep decrease is down to a natural reduction in electricity demand with warmer spring weather, in combination with consistently windy conditions. Our Market Operations Weekly Report contains the latest information about the electricity market, including security of supply, wholesale price trends and system capacity. [Click here](#) to receive the report via email every week. Information is available on New Zealand's electricity supply, demand, and transmission and distribution. So why are near-term winter future prices.

### [Winter 2025 Electricity Market Outlook -- Tenco](#)

The convergence of low hydro storage, constrained gas supplies, and infrastructure challenges suggests that electricity prices will remain elevated through winter 2025.

### [The need for energy storage: Firming New Zealand's renewable ...](#)

Concept Consulting's modelling shows that without thermal generation from the Rankine units as part of New Zealand's energy storage solution, wholesale electricity prices would likely be 60% higher in the ...

### [New Zealand's electricity future: generation and future prices](#)

Electricity spot prices during these times are generally high, as expensive fossil-fuelled generation is needed to meet high demand. Most new renewable generation is intermittent.

### Wholesale prices plummet as the proportion of renewables increases

Wholesale electricity prices tend to decline as winter moves into spring and electricity demand falls while rainfall lifts hydro lakes. But this isn't always the case.
