## Utility-Scale ESS solutions

## Overview

---

Discover how León's cutting-edge vanadium redox flow battery project addresses energy storage challenges while supporting Nicaragua's renewable energy transition. With frequent voltage fluctuations affecting 15% of industrial operations last year, Nicaraguan businesses increasingly seek reliable energy storage solutions. Liquid flow batteries offer three distinct advantages: When a 50MW solar plant in León experienced 18% energy waste during peak production. This project, selected through an international tender with six proposals, will be the largest energy storage system in Central America once operational by the end of 2025.
