

Nissan Solar Power Generation Franchise

Overview

YOKOHAMA, Japan — Nissan today announced that it will showcase a prototype vehicle equipped with an onboard solar power generation system at this month's Japan Mobility Show 2025. Named the 'Ao-Solar Extender,' the system has been installed on Japan's top-selling EV. EV users and fellow engineers: Bringing these folk together, Nissan engineer Junichi Inoue works to advance technological innovation with a focus on co-creation. Through combining his own experience in EV development and his team members' expertise, he is shaping a user-centric EV future through. Extendable, roof-mounted solar system installed on Nissan Sakura Kei EV. System harnesses sunlight to add up to 3,000 km¹ of driving range annually. Project seeks to reduce dependence on the grid and enable effortless charging. With the advent of EVs. Nissan has officially revealed a solar-powered version of its best-selling Sakura electric car. Debuting as the Ao-Solar Extender Prototype at the 2025 Japan Mobility Show, this new concept adds a roof-mounted solar system capable of generating up to 500 watts of power — enough for approximately.
