

# Outdoor power supply charges and discharges at the same time

## BASIC APPLICATION

Storage systems have been proven to be "extremely lucrative" for commercial and industrial (C&I) filed.

## Overview

---

Pass-through charging allows a portable power station to charge while also powering other devices. This feature allows the power station to act like a continuous power bridge — drawing electricity from an input source (such as. This advanced inverter/charger allows seamless transition between grid and battery power, creating the effect of simultaneous charging/discharging. Its PowerAssist technology boosts capacity during high loads while charging, making it ideal for off-grid solar setups. The 48V/5000VA model ensures. Do any Solar generators/Power station allow charge and use at the same time?

Do any Solar generators/Power station allow charge and use at the same time?

Does anyone know of anything that can both charge and provide power at the same time?

Thanks.
