

Photovoltaic Energy Storage Thermal Management Market

Overview

The thermal energy storage systems market was valued at USD 54.4 billion in 2024 and is estimated to grow at a CAGR of 5. The Energy Storage Thermal Management Market is a vital component of the global transition towards sustainable energy. Thermal energy storage (TES) allows thermal energy to be stored in the off-peak hours when electricity is cheaper and released when electricity demand is higher. This helps lower costs and relieves the load on the grid.
