

Photovoltaic bracket patent case

Overview

An object of the present disclosure is to provide a flexible photovoltaic tracking bracket in which a photovoltaic module is not easily twisted, thereby effectively improving the structural stability and ensuring the power generation. The invention discloses a photovoltaic bracket. The bracket comprises a photovoltaic panel supporting frame and a plurality of lower supporting frames, wherein each lower supporting frame has a base, a first upright column, a second upright column and a diagonal brace; each first upright column. A photovoltaic system and a flexible bracket thereof. The photovoltaic assembly support system mainly includes a support body, a lower connecting member and an upper connecting member.
