## Overview

---

With 68% of renewable energy projects now incorporating storage solutions [5], getting the capacity design right isn't just technical jargon - it's the difference between energy independence and watching Netflix by candlelight. Let's break down the storage tech smorgasbord:. This study proposes an optimization strategy for energy storage planning to address the challenges of coordinating photovoltaic storage clusters. The strategy aims to improve system performance within current group control systems, considering multi-scenario collaborative control. The guide is organized around 12 topic area questions.
