A PV system grounding diagram is a dedicated part of. This article covers grounding in PV systems, which differs slightly from standard grounding systems. End Clamps are fastened with 18-8 Stainless /4-20 x 3/4" bolts and K-L ing solar panels in a row to the SF Rail. These are the basic components of an installation: Solar Panels: The panels are connected to an inverter that onverts direct current (DC) to a ounding conductorconnecting all of the metal components.
