

Photovoltaic panel greenhouse installation cost standard

Overview

A professionally built greenhouse costs around \$11,000, with most homeowners paying between \$2,000 and \$25,000. For smaller growing spaces, homeowners can install a smaller, prefabricated greenhouse, buy a greenhouse kit, or DIY it. Solar greenhouse panels can save money on electricity, but the initial cost is higher, with an average cost of \$35 to \$45 per square foot. The cost of a solar energy system depends on the size of the system, the complexity of the roof installation, and the choice of solar panels. Here are realistic ranges most gardeners land in: Basic panels, a modest battery bank, charge controller, wiring, and a simple fan/light setup—ideal for a typical hobby. NLR analyzes the total costs associated with installing photovoltaic (PV) systems for residential rooftop, commercial rooftop, and utility-scale ground-mount systems. This work has grown to include cost models for solar-plus-storage systems. 50 per watt**, depending on location, system size, and installer.
