

Photovoltaic panel maintenance work mat

Overview

The mats listed below are designed to block electrical current, withstand harsh environments, and provide lasting protection in both home and commercial settings. Rubber is a dielectric material that blocks the flow of electric current. Our rubber mats provide superior insulation for use near high-voltage equipment. The article outlines maintenance procedures for photovoltaic systems, including inverters, charge controllers, PV arrays, and battery banks. This includes checking inverters, charge controllers, PV. Operations and maintenance (O&M) is critical for keeping solar photovoltaic systems performing at their best over their lifetime.
