

Photovoltaic panel work is good for girls

Overview

This guide is here to help women learn about what the solar energy field has to offer them, with information and advice on education and career options, scholarship opportunities, salary estimates, industry trends and much more. Key players in the solar industry are working to reap the benefits of a gender-balanced workforce. Credit: Monthira via Shutterstock. 2 million. According to the most recent IREC Solar Jobs Census, women accounted for 30% of the U. solar workforce, with an estimated 82,850 female workers. Things are changing, however, although slowly. Our sector employs almost the same percentage (40%) as the oil and gas sector (22%). Given climate change and the rapid growth of solar due to its increasing affordability, there is a great need to train more skilled technicians who know and understand solar. This effort must include a focus on women, who currently make up only a small percentage of the existing workforce in solar.

Photovoltaic panel work is good for girls

[Breaking Barriers: The Rise of Women in the Solar Panel Industry](#)

When you picture a photovoltaic panel installer, do you imagine a burly guy in a hard hat? Think again. The solar energy sector is seeing a quiet revolution - and it's being powered by women wielding ...

[What is the status of women in the global solar PV industry?](#)

Women represent 40% of the global solar photovoltaic (PV) workforce, double the share in the wind industry and oil and gas sector. However, they are mainly in administrative and non-STEM ...

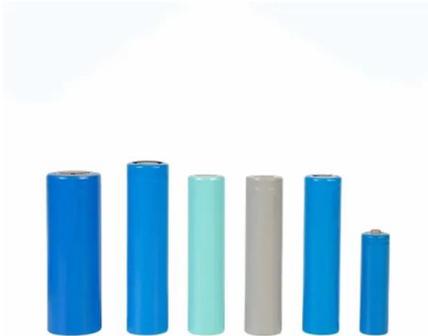

[Women in Solar: Key Facts, Statistics, and Trends](#)

According to the most recent IREC Solar Jobs Census, women accounted for 30% of the U.S. solar workforce, with an estimated 82,850 female workers. That's a 23% increase from 2018, when just ...
