

Power selection of industrial frequency inverter

Overview

This guide outlines the key factors to consider when selecting an IPM for industrial inverter applications, helping engineers make informed design decisions. At present, SINEE has R&D, production and service bases in Shenzhen, Wuhan, Suzhou and Wuxi. power electronic application technology. The EM760 series inverter is a high-performance vector control. Frequency inverters improve how motors work and save energy costs by up to half. Working well with current systems is important, especially when adding renewable energy sources. Selecting the right Intelligent Power Module (IPM) is a critical step that directly affects system reliability, efficiency and development cycle.
