

Powering livescope with dewalt battery

Overview

My GARMIN LIVESCOPE Install, DeWalt Battery Hack, GARMIN Networking Tutorial + TIPS! I just wanted to do a quick video on how I installed the Garmin Livescope and the three graphs on my boat. I hope this helps somebody doing it themselves. Feel free to ask questions if. Here is a run-through of my Garmin install on my Nitro. I also networked all graphs and Livescope. With that said, I still run my helix 5 and helix 10 on Dakota lithium and only use the other as backup if I run the lithium dead, and only created that setup because I have like 12 18v. Does anyone have the video of the guy that rigged a 20 volt Dewalt battery using a Seelite adapter. Rated for 10-32v so are most of thier head units.

Powering livescope with dewalt battery

[questions about dewalt 20v powering a livescope setup for ice](#)

Livescope is power hungry and you will want at LEAST 18ah at 12v which means either using a 20v rated at 12ah if stepping down to 12v, or switching smaller batteries constantly all day.

[running livescope on dewalt batteries](#)

Nope, you don't have to step down the voltage. Just need the battery connector with the 2 wires coming out. You must log in or register to reply here.

You can get a lithium battery for the cost of one flex volt battery, that lasts just as long as your two flexvolts. Plus include the cost for the adapter to use a flex volt battery.

[Garmin Livescope Q&A, Don't beat me up over this but, Is the dewalt](#)

I run my Garmin units on a dedicated 12v Dyness battery (small and light) but can easily wire up two Dewalt 20 v batteries in parallel as a backup when the bigger battery slows down.
